MUHAMMAD AMAS

Full-Stack Software Engineer – AI Integrated Systems & Cloud Platforms

+92-323-3263278 . amaswaseem@gmail.com . Portfolio . GitHub . LinkedIn

Full-stack engineer with 3+ years shipping production AI systems, including RAG pipelines, agents, and AI-driven automation on top of React, Next.js, Node.js, NestJS and Python backends. Took AI features from prototype to production on AWS, GCP and Azure, with measurable gains in performance and onboarding time.

EXPERIENCE

Eplanet Global Karachi, Pakistan

Software Engineer Jul 2026 - Present

- Delivered full-stack features (Node.js/Express backend, React frontend) across 10+ production platforms spanning appointment booking, marketplace, workforce management, fintech, and SaaS products.
- Designed and built end-to-end appointment and booking workflows, including slot-based and per-minute bookings, rescheduling, extensions, counter-offers, and dispute handling, spanning both API and UI layers.
- Built payment and wallet systems using Stripe (Connect, payouts, refunds, escrow) and in-app purchases, handling the full transaction lifecycle from checkout to vendor payout.
- Implemented real-time features with WebSockets/Socket.IO, including live chat, location tracking, ride bidding, and booking status updates, reflected instantly in the frontend UI.
- Built a full ride management product end-to-end, covering passenger/driver lifecycles, fare estimation, ratings, and reporting, with client-facing screens for both rider and driver apps.

Geeks of Kolachi Karachi, Pakistan

Software Engineer Sep 2025 - Jun 2026

- Led the transformation of a legacy ERP system into an AI-first platform, embedding intelligent automation and decision-support directly into core business workflows.
- Engineered and deployed scalable full-stack and backend systems across AI, marketplace, workforce management, and SaaS platforms using Next.js, NestJS, Node.js, Ruby on Rails, PostgreSQL, and MongoDB.
- Shipped AI-powered features including personalized content delivery, intelligent summarization, and tutoring assistants using Gemini and Google Cloud, replacing manual steps with automated workflows.
- Implemented LangChain and OpenAI integrations to power intelligent agents, document processing, and natural language interfaces within production systems.
- Architected RAG (Retrieval-Augmented Generation) pipelines combining vector databases, embeddings, and LLM integrations to deliver context-aware, accurate responses at scale.
- Designed backend infrastructure for scheduling, escrow payments, bookings, and dispute management, building secure and high-performance APIs that support real-time vendor and customer operations.
- Owned end-to-end feature development for production-grade platforms, delivering responsive experiences, admin dashboards, and scalable business workflows across web and SaaS ecosystems.

Atompoint Cloudnosys (B2B Cloud Security SaaS Platform) Karachi, Pakistan

Software Engineer Oct 2023 - Sep 2025

- Designed and implemented cloud infrastructure visualization graphs using libraries such as React Flow, Elkjs and Cytoscape.js to represent complex cloud environments.
- Visualized attack paths, blast radius and security misconfigurations within the organizational infrastructure to enhance security posture and risk assessment.
- Reduced onboarding time by 80% by automating GCP and Azure account integrations using OAuth and MSAL for token-based provisioning and role assignment.
- Migrated 50+ microservices from Node.js v12 to v20 and led a frontend overhaul that delivered a 60% performance improvement.
- Led the platform's frontend modernization, improving maintainability and user experience.
- Integrated CIS, NIST, ISO 27001, GDPR, and Saudi NCA compliance frameworks into the frontend, partnering with DevSecOps, MLOps, and cloud security teams to ship AI-first features.
- Built APIs automating application provisioning, account creation, and permissions across clouds.

INTERNSHIPS

Atompoint Cloudnosys (B2B Cloud Security SaaS Platform) — Karachi, Pakistan
Software Engineer — Jul 2023 - Sep 2023

VentureDive (Software Development Company) — Karachi, Pakistan
Web Intern — Feb 2023 - May 2023

Tezeract (Innovative AI Solution Provider) — Karachi, Pakistan
Frontend Intern — Jul 2022 - Aug 2022

PROJECTS View more

- **InsightEdu** Developed a full-stack AI-powered EdTech platform using React, TypeScript, Tailwind, and Firebase to enable real-time attentiveness tracking and personalized analytics in online classrooms. Integrated MediaPipe to monitor student activity during sessions and used Node.js with Express to build secure APIs to manage users, meetings, and reports. Implemented automated email notifications via Brevo to boost student engagement and provide educators with actionable insights.
- **Attractify** An AI-powered platform for real estate professionals (built for eXp Realty agents) to attract more agents, scale their business, and optimize lead generation. Built with React and Ruby on Rails, integrating Twilio, GoHighLevel (GHL), AWS, and Kamal for deployment.
- **Partygo** Architected and implemented a scalable backend for a booking platform with Customer, Vendor, and Admin panels, supporting listing creation, booking workflows, and approval management. Built the backend with Nest.js and MongoDB.

EDUCATION

University Of Karachi (UBIT) — Karachi, Pakistan
Bachelor of Science in Computer Science — Feb 2021 - Nov 2024

SKILLS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Nest.js, Ruby on Rails, Redux Toolkit, Redux-Saga, Ant Design, MUI, Tailwind CSS, Chakra UI, React Flow, ELKjs, Radix UI, Shadcn
Technical Languages: JavaScript, Python, SQL, HTML, CSS
Databases: MongoDB, Firestore, Microsoft SQL Server, PostgreSQL, MySQL, Redis
AI & LLM: LangChain, OpenAI API, Gemini, RAG, Embeddings, Vector Database (pgvector), Prompt Engineering, AI Agents, Claude Code, Cursor, MediaPipe
Clouds & Tools: Amazon Web Services (AWS), Google Cloud Platform (GCP), Azure, Docker, Firebase, Stripe, Clerk

PROFESSIONAL CERTIFICATION

- **Google Cloud Digital Leader** Cloud fundamentals & digital transformation
- **McKinsey Forward Advance Level** Strategic problem-solving & data analysis
- **Backend Development and APIs** Node.js/Express, API design, databases

EXTRA-CURRICULAR ACTIVITIES

Google Developer Student Club – UoK
Executive Lead — Sep 2023 - Oct 2023

- Visited Ilmesters (an IB School), conducted an info session on GDSC, STEM & Google Solution Challenge.

Technical Co-Lead — Sep 2022 - Sep 2023

- Conducted 3 informative sessions and workshops named “Git and GitHub 101” in 4 days, which 250+ students attended.
- Moderated "Solution Challenge Info Session" attended by over 120 students and faculty members.
- Organized and moderated recruitment drives for students and provided other learning opportunities.
